## High Priority Fill Wall Option Stone-Faced Concrete Retaining Wall

### Description:

Retaining wall is built of concrete and faced with a real rock surface to give the appearance of a stacked rock or stone-mortar retaining wall. The concrete retaining wall is "veneered" with a layer of rock that is mortared into place.

### Approximate Cost:

\$20.50 to \$35.00 a square meter (\$1.91 to \$3.25 a square foot) for stone veneer.

### Advantages

- ◆ Appearance can be made to look like masonry wall or mortar type walls.
- ◆ Walls blend into the natural surroundings.
- ◆ Rocks can be repaired and replaced by using common masonry practices.
- ◆ The rock-veneered face can have a reveal ranging from 2 to 4 inches.
- ◆ Can face traffic on guardwalls.

### Disadvantages

- ◆ Slightly higher cost than form liner and staining.
- ◆ Maintenance cost to repair the stone veneer guardwalls that face traffic will be high.
- ◆ Difficult to get a significant percentage of stones greater than 2 square feet.
